Steps in uploading Data warehouse Inventory_fact table and its dimensions in IBM DB2 Cloud.

1. Upload InventoryScript1.sql in a blank tab:

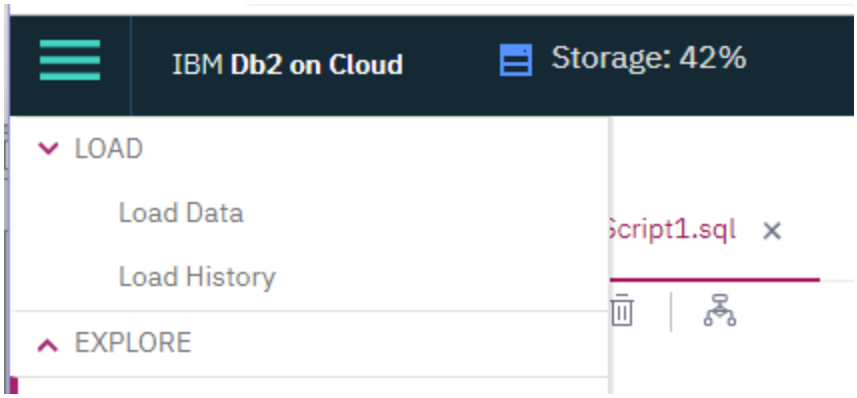

2. Click **Run all**.

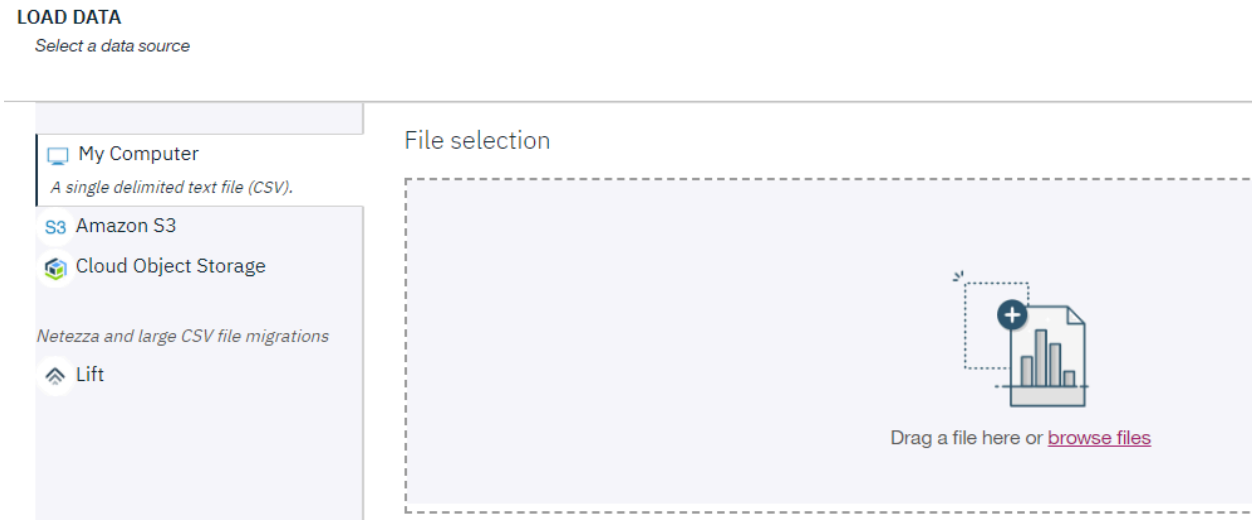

Load the Inventory_fact Data

3. Download Inventory_fact.csv.
4. Click **Load Data**:

5. Select **browse files**.

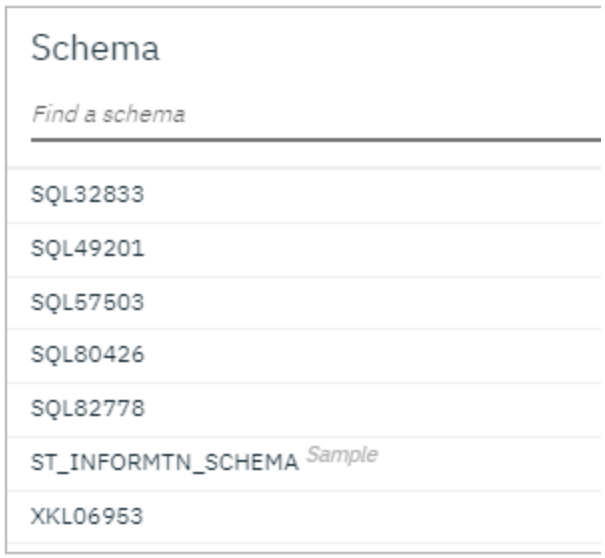

6. Select **inventory_fact** from your Download folder.

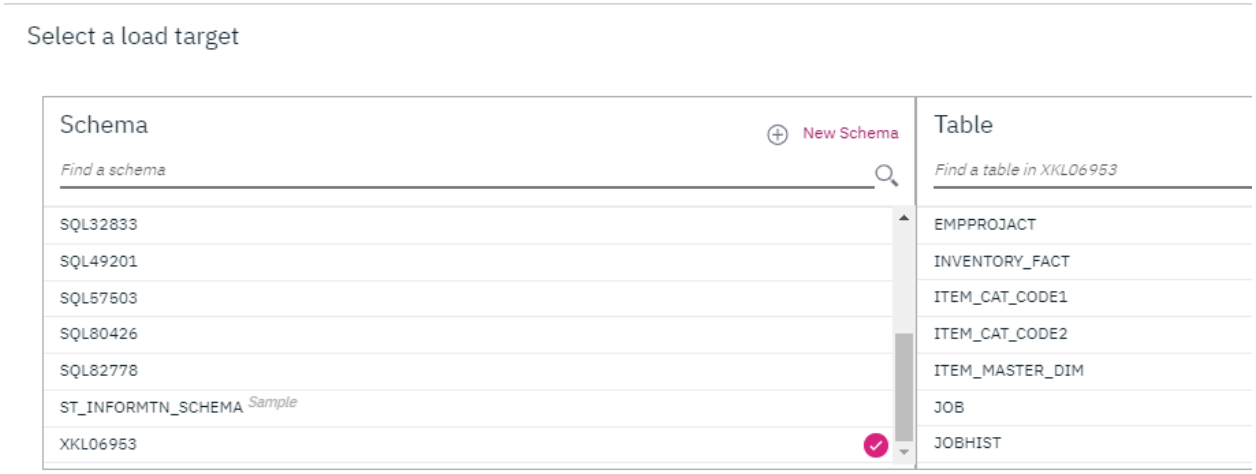

7. Click the Next button.

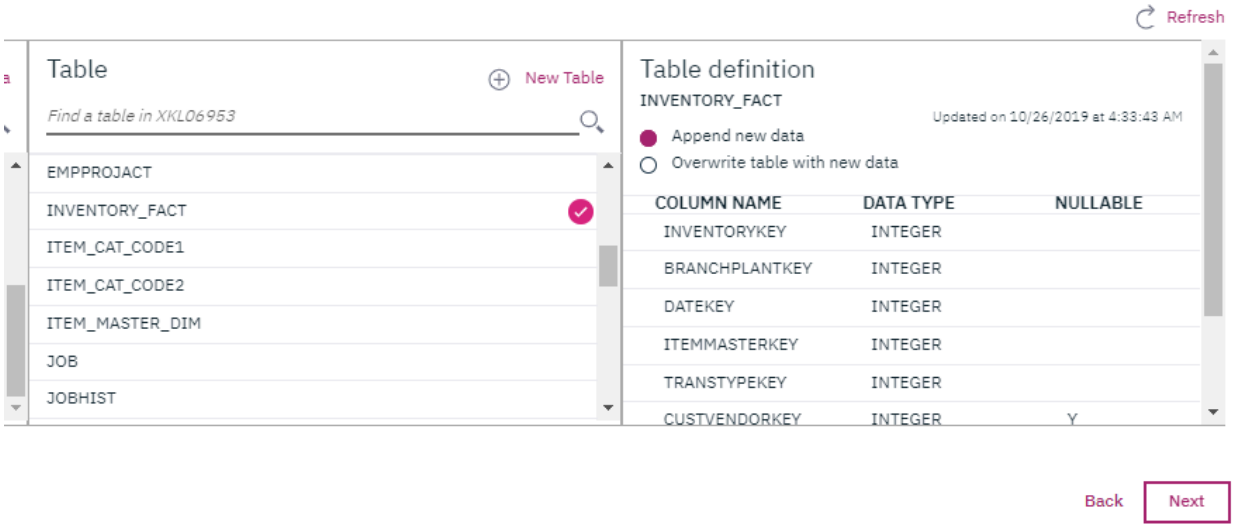

8. Find your own userID schema (we have different schema). Click that schema:

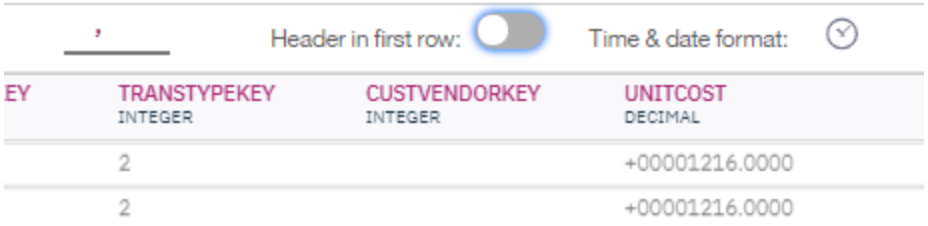

9. Click Inventory_fact.

10. Click the Next button.

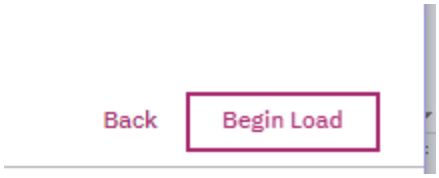

11. Slide to UN-check **Header in first row.**

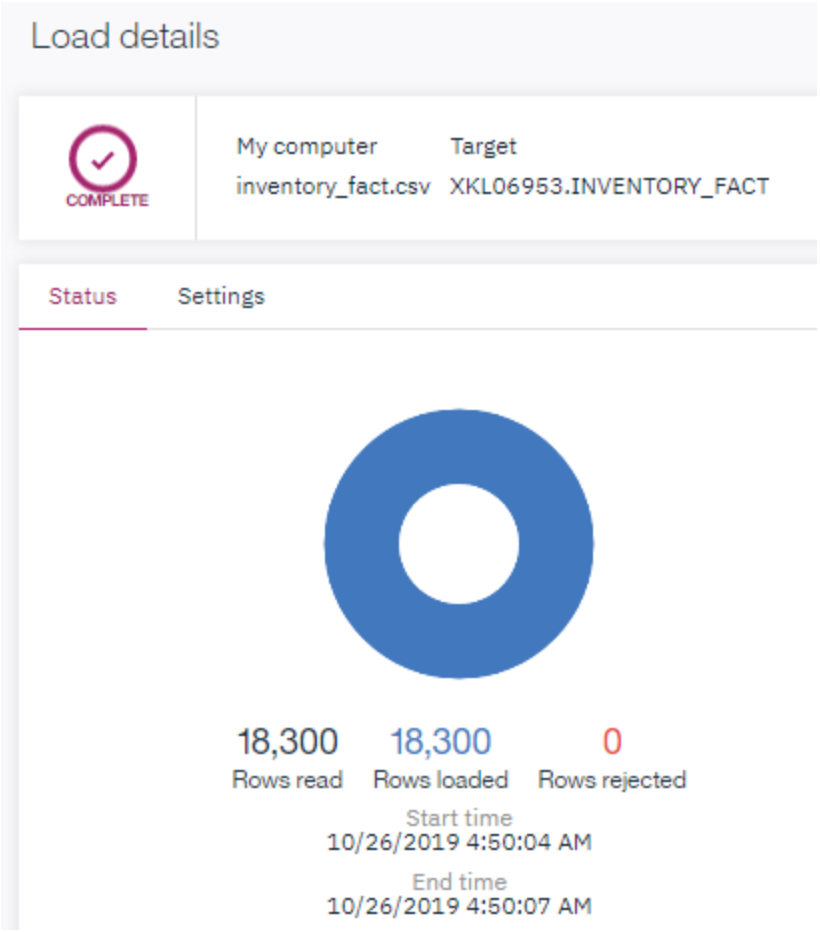

12. Click the **Next** button.

13. Click **Begin Load**.

14. You must load 18,300 rows.

Add constraints to inventory_fact table.

15. Click **Run all**.
